PROFESSIONAL SUMMARY

First-year B.Tech Computer Science Engineering student at Lovely Professional University with practical skills in cybersecurity, full-stack web development, and AI-integrated application development. Competitive CTF participant achieving top-4 finishes, including solo placements. Builds production-grade projects under hackathon conditions and continuously advances skills through certifications in ethical hacking, Python, and web development.

EDUCATION

Bachelor of Technology – Computer Science Engineering **2025 – 2029**

Lovely Professional University, Punjab, India

- Focus areas: Cybersecurity, Full-Stack Development, AI/ML, Data Structures & Algorithms
- Active participant in university hackathons, CTF competitions, and technical clubs

ACHIEVEMENTS

CTF Encrypted – ThunderCipher Platform **Nov 2025**

Rank 9 / 50+ Teams

- Demonstrated skills in forensics, web exploitation, and cryptography in a competitive inter-university CTF.

Trivana CTF **Jan 2026**

Rank 4 / 50+ Teams — Solo Participation

- Achieved top-4 placement as a solo participant competing against full teams.

Web-A-Thon 2.0 – University Hackathon (24hr) **Feb 2026**

Qualified 3 out of 4 rounds

Built UrbanSquare, an AI-integrated home services platform, under 24-hour hackathon conditions

Xploit404 CTF – Hosted by CSEMA **Apr 2026**

Rank 4 / 50+ Teams

- Competed in a cybersecurity-focused CTF hosted by CSEMA, showcasing offensive security and problem-solving skills.

.

PROJECTS

UrbanSquare **React · Node.js · AI**

- AI-integrated home services platform featuring photo-based emergency detection and automated agent dispatch in under 5 minutes.
- Implements dynamic pricing engine and dual dashboards (user + service agent). Built at Web-A-Thon 2.0 (24hr hackathon), qualifying 3 of 4 rounds.

Profile Guardian **Python · Scraping · ML**

- Social media authenticity analyzer that detects fake accounts, bots, and inauthentic behavior across Instagram, X, and Reddit.
- Built at Prompt Builder 2.0 (12hr hackathon) using machine learning classification and automated scraping pipelines.

Placement Guardian **FastAPI · Python · SQLite · React**

- Agentic AI placement coach providing personalized roadmaps for DSA preparation, course recommendations, and interview readiness.
- Built using React-style AI agent architecture. Developed at HackAI Season 2 (24hr hackathon).

TECHNICAL SKILLS

Languages	Python, JavaScript, C/C++, Bash, Linux
Cybersecurity	Network Security, Web Pentesting, CTF, Vulnerability, OSINT, Cryptography
Tools	Wireshark, Burp Suite, Nmap, Metasploit, Git, VS Code
Web	HTML/CSS, React, Node.js (MERN Stack)
Databases	SQL, SQLite
Learning	Reverse Engineering, Binary Exploitation, Malware Analysis

CERTIFICATIONS

Introduction to Cyber Security **Mar 2026**
Infosys Springboard

Web Development – MERN Stack **2025**
TuteDude

Python Programming **2025**
TuteDude

Indian Laws: Know Your Rights **Oct 2025**
Learn Foundation Online

Ethical Hacker **In Progress**
Cisco Networking Academy
